

carus

the art of communication

THE ORIGIN OF ALL VALUES.

A symbiosis between responsibility and communication of the senses.

*"The creation of a violin is, for me,
like the creation of an individual."*

Gregor Lange, violin maker

PHILOSOPHY

We humans determine the cycle of life at every moment through our action. In the manufacturing of products we can honour our commitment to the environment through sustainable processes.

In addition to the conscientious handling of resources, this symbiosis has a further dimension: it is the force of our senses which we express in craftsmanship. Only our hands are able to give products feelings. In this

they become what makes us humans equally important – something unique. The better we master the art, the more valuable and more durable goods we will create.

For CARUS, these are key elements in the fabrication– a symphony between man and nature.

A REMARKABLE INSTRUMENT COMES INTO BEING.

Pure passion in manufacturing gives CARUS door communication devices their noble face and their strong character.

*"Time and again it is a
fascinating moment when a
CARUS device is finished
by hand"*

Mark Duffner, Product Manager CARUS

PRODUCTION

Our CARUS devices are produced with the utmost care and great attention to detail. We believe that it is precisely this ambition that contributes to the fascination of the devices. CARUS devices are made for a long life. Like sculptures, the components are hewn from massive blocks. Each step of the high precision CNC machines is permanently controlled under the watchful eye of our staff. Prior to finishing, the surfaces are given their striking structure by hand. In the final assembly, again all components find together only by hand.

CARUS TURNS YOU INTO THE CONDUCTOR OF YOUR SPATIAL COMMUNICATION.

CARUS – the development of a personality. As individual as you.

... the art
of communication

A concert describes the harmony between conductor and musicians, who, with their instruments, touch the senses and the heart of the audience. Create and experience your own composition with CARUS.

CARUS – A DUET OF AESTHETICS & FUNCTION.

The amalgamation of material, form and function into your perfect communication instrument.

DESIGN

Timeless aesthetics, high-quality materials, ergonomic operating elements and the rigorous reduction to primary functions and forms characterise the timeless and original design of CARUS devices. CARUS harmonically incorporates clear lines and noble surfaces into the different settings of your working and domestic life. CARUS meets your individual demands and needs through a variety of design, operation and equipment versions.

Camera control

Control your speed dome camera via the CARUS indoor station so that you can keep an eye on everything.

Extended switching functions

Use your convenient CARUS indoor station to control your lighting or to operate your blinds. The possibilities are virtually endless.

Network connection

Have your door calls displayed on your PC or notebook. Open your doors to greet your visitors easily with a click of the mouse.

Redirection to mobile telephone

Enables your door calls to be redirected to your mobile phone in your absence.

Direct call mobile telephone

Connect your CARUS to your telephone system and dial an external number directly via the indoor station.

Internal communication

Use the door communication infrastructure to communicate inside your house, your office or your practice.

Access control

The integrated code lock and the integrated card reader expand your door station to a state-of-the-art safety lock.

Status indication

With simple extensions you can see at a glance whether, for example, all your windows are locked before you leave the house.

BRILLIANCE IN PERFECTION CARUS ADAPTO

Audio/Video indoor station

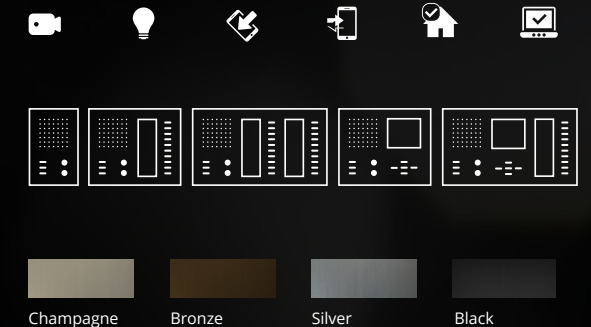

*The **diamond** is synonymous with **value** and **quality**.
It is changeless and unique and captivates with its surface
– like **CARUS** devices.*

MULTI-FACETED LIKE A DIAMOND

The CARUS ADAPTO series enchants through its multi-faceted presence. Give expression to your individuality with an elegant accessory on your desk. As the name suggests, these devices meet your needs. There is also the possibility of adding various control and display functions for direct fingertip access or LED display. Housing and keys are made of high quality brushed aluminium (solid material). These devices are available in four different anodised colours (silver, champagne, bronze, black) and as a wall-mounted or table-top version.

*The compass is an Instrument that points the way.
Just like CARUS devices – which combine indicatory
signals in a single instrument.*

SETTING STANDARDS

Like a compass the CARUS ORIGO series points the way, and CARUS sets new standards in design and technology. CARUS ORIGO is the compact video version with comfort functions. With its sleek design and an integrated display, CARUS ORIGO offers first-class video communication in a classic yet elegant design. In accordance with the CARUS standard the housing is made of solid aluminium, the surface of which is hand-finished with an elaborate structure.

TOUCHING ALL OF THE SENSES CARUS TAVOLA

Android IP telephone with integrated door communication and touch screen

The face of communication consists not only of a dialogue through words and glances but also of the impulse of a simple touch. Like CARUS instruments, which appeal to all the senses.

INTUITIVE OPERATION

This IP telephone is based on the latest Gigaset pro technology and was optimised by us especially for the needs of door communication. In combination with its solid, refined base, fashioned in the CARUS style, it blends seamlessly into the product family. In combination with our IP door station ARGOS, TAVOLA is the perfect modern door communication unit. Technically, this device offers a multitude of features: 10.1 inch display, Android 4.2 operating system, video telephony in HD quality, including video conferencing functions and telephone handset with DECT wireless technology for free and unrestricted movement.

Interfaces: WLAN, DECT, HDMI, LAN, Bluetooth and HDMI. Also comes with wall bracket on request.

VISION & ELEGANCE

CARUS IRIS

Audio/Video outdoor station with a secure 180° field of vision

THE HIGHLIGHT IN YOUR ENTRANCE AREA

With the CARUS IRIS outdoor station we bring vision and elegance in front of your door. The surface-mounted housings are made of solid aluminium. The design features a clear, geometric, formal idiom, high-quality surface finishes and an innovative sound aperture with very high tone quality. A twilight sensor controls the discrete lighting. These devices are available in 2 colours as audio and video versions.

Silver

Black

NATURAL PERFECTION CARUS ARGOS

Audio/Video outdoor station with a natural design language

ELEGANT AND CHARMING

CARUS ARGOS was designed as an outdoor station for both sophisticated residential property and commercial use. The name of the resident is chosen via a bright 5.7 inch LCD display with intuitive touch screen operation. High-quality echo suppression is used for natural reproduction. The video recording is made using a 100° camera with a 2 mega pixel CMOS sensor. CARUS ARGOS can also be used for access control. It has both an integrated RFID reader and a combination lock. The initial screen can be individually adapted to customer requirements.
